EXPERIENCE: LATEST THREE

Software Developer

Delivery Hero

📅 October 2019 – Ongoing   ⚲ Berlin, Germany

- Migrated 12 years old monolith from Python2 to Python3
- Wrote and owned new services in Python and deployed them to GCP with Terraform and Kubernetes
- Proactively monitored, identified, and fixed system performance issues

Senior Software Developer

Super Dispatch

📅 May 2016 – May 2019   ⚲ Kansas City, MO

- Led a team of 5 people and served as a product owner
- Optimized the database queries almost by 300% in a Django app
- Regularly have been giving talks about clean code, automated tests, and industry news and best practices
- Wrote the company's first microservice
- Dockerized all of the applications and migrated the whole infrastructure from Digital Ocean to GCP using Kubernetes
- Set up the CI/CD pipeline with Jenkins and centralized Logging System with Graylog
- Optimized the tests performance by 50%
- Refactored the whole AngularJS codebase to match the industry best practices, specifically John Papa's
- Helped the company grow almost 300% since joining (at the time of writing)

Software Developer

Newmax Technologies

📅 Nov 2015 – May 2016   ⚲ Tashkent, UZ

- Built micro-services in Golang
- Built SPAs in AngularJS
- Wrote Unit and End-to-End Tests

A DAY OF MY LIFE

- Spending time with family and friends
- Product ownership
- Developing software
- Sleeping & dreaming
- Reading books and working on my skills
- Writing blog posts

LIFE PHILOSOPHY

"We are what we repeatedly do."

MOST PROUD OF

Initiative I showed
to tackle hard problems for which we did not have time

Super Dispatch's Growth
from a few people to 35 awesome engineers

International experience
in US and Europe based companies

Giving back to community
by contributing to OS projects such as Pretalx and Pretix, answering questions at StackOverflow (10k rep.) and sharing knowledge in my blog at rahmonov.me

STRENGTHS

Hard-working   Fast-learner   Ambitious

Python   Django   Product Ownership   Kubernetes   DevOps
